**The New Evolution of
Space Violets**

In a sensational effort that launched African Violets into a new frontier, the Optimara Space Violet program put more than 25,000 seeds into orbit for nearly six years. This unusual step, in the annals of potted and flowering plants, turned out to be one giant leap that has produced significant and exciting characteristics for African Violets. Now, for the first time, these characteristics are available in a series dedicated exclusively to Space Violets. The EverFloris series is comprised entirely of African Violets that have been developed from the Space Violet program. They're bigger and easier to grow, with larger, fuller blooms that flower continuously. Unless they're EverFloris, there's no place on Earth you will find African Violets like these.

- Each plant comes with a plant care tag and stake!
- Box and shipping charges still apply

50 cell tray provides larger plant.

15 weeks to finish in 6" pot.

10 weeks to finish in 4" pot.

EverFloris violet produces more than twice the bud count as compared to standard violet varieties.

Plants have thick curly leaves and larger plant mass than standard violet varieties.

This variety is considered a "Space Baby" since its genetic background is descended from seeds that were in outer space for 5 1/2 years.

Ideal plant for 6" production.
